

November 3, 1961

Dr. Gunther S. Stent
Department of Virology
University of California
Berkeley 4, California

Dear Gunther:

I'm sorry we haven't had a chance yet to welcome you back - I had thought our meeting last Saturday might have furnished a possible occasion and I have to apologize for having to postpone that at the last moment.

Your idea of holding another Phage Meeting is an excellent one and I would certainly be enthusiastic about having it at the California Alumni Center. The following people would be very much interested in the possibility of attending: Baron, Bodmer, Nester, Geneser, and Esther and myself. Probably not quite all of us would actually come.

There is one possible concern about the dates, namely, that it may or may not conflict with a period when I hope to be visiting Japan next spring, but I do not think I would be able to suggest a better possibility and it would be most sensible to just leave it as you put it for the end of March. Except for this possibility, it would be a most appropriate time.

Yours sincerely,

Joshua Lederberg
Professor of Genetics
